Price R1 250 000.00

Reason for selling: Persistent back and neck pain associated with flight in the high "g" aerobatic environment.

I would consider a Zlin 50 LA as a trade-in.

In the event that taildragger training and/or aerobatic training is required, I will include a training package (at the purchaser's expense) to ensure that the buyer is brought up to speed in these departments.

To this end, I have a variety of tailwheel machines at my disposal and for the aerobatic training, I will use a Decathlon, Pitts and Extra.
